Broad Bean Seed Information

Coles Dwarf

Matures approx 11-13 weeks
Compact vigorous plant with a concentrated pod set.
Plants about 100cm tall. Pods are short, thick and well filled approx 20-25cm long.

Available in pack sizes: 200g and 500g.

Early Long Pod

Matures approx 11-13 weeks
An early maturing selection from Exhibition Long Pod.
Plants about 100cm tall. Pods are fleshy short, & approx 25-28cm long.

Available in pack sizes: 200g and 500g.

Evergreen

Matures approx 11-13 weeks
Green seeded cultivar approx 90cm tall. Evergreen has smaller beans than other cultivars. The beans remain bright green when cooked and have mild flavour.

Available in pack sizes: 200g and 500g.

Janet

Matures approx 11-13 weeks

Has a lovely taste and good texture. Suitable to freeze. May flower more than other varieties. Grey in colour. Plant approx 90cm tall. High yielder.

Available in pack sizes: 200g and 500g.

Planting Broad Beans

Broad beans are a great cool season vegetable and can be planted from April through till September. One advantage to the home gardener is that broad beans freeze well.

Plant approx 4cm deep, 10cm apart and rows approx 90cm apart

Some of the taller broad beans may grow 2 metres and may need to be staked. However, they will not grow as tall if the tops are nipped off when plants are approx 30cm high. This will encourage more shoots to break out from below, creating a shorter busier plant.

Harvest before the beans get too mature. If left too long they can become chewy after cooking.
