Green Crops Seed Information

Blue Lupin, Mustard and Grain Mix

This green crop in particular is great as it helps with the prevention of wire worm and adds nitrogen and organic matter to your vegetable garden.

Plant this green crop in late summer to autumn.

Sow approx 35g per square metre.

Let green crop grow for approx 7-8 weeks, then dig well back into the ground.

Approx 2 weeks later re-dig the soil before planting your new vegetables for great results.

Available in pack sizes: 500g, 1kg and 2kg.

Blue Lupins

Blue Lupins adds nitrogen and organic matter to your garden.

Plant in the late summer to autumn.

Sow approx 25g per square metre.

Let green crop grow for approx 7-8 weeks, then dig in well. Although Blue Lupins can have a beautiful flower, to get the best from your green crop you need to dig it back into the soil when the stems are still green and soft

Available in pack sizes: 500g and 1kg.

Mustard

Mustard is a great help with the prevention of wire worm and adding of organic matter to the soil.

Plant late summer to autumn.

Sow approx 20g per square metre.

Leave the crop for 7-8 weeks then dig in well.

Available in pack sizes: 200g and 500g.

Barley

Planting Barley over the winter will add protein to soil and improve soil structure.

Plant late summer to autumn.

Sow approx 45g per square metre.

Available in pack sizes: 1kg and 2kg.

Oats

Planting Oats over the winter will add protein to soil and improve soil structure.

Plant late summer to autumn.

Sow approx 45g per square metre

Available in pack sizes: 1kg and 2kg.

Wheat

Planting Wheat over the winter will add protein to soil and improve soil structure.

Plant late summer to autumn.

Sow approx 45g per square metre

Available in pack sizes: Pack size 1kg and 2kg.
